To Whom It May Concern,

The CHAMPRO batting helmet jawguard model HXG is approved for use on all Champro HX batting helmets. The Junior and Senior sizes of HX batting helmet are certified by SEI with and without the jawguard attached; the T-Ball size of HX batting helmet is certified by SEI to meet the NOCSAE standard and can also be used with the jawguard without impacting the SEI certification of the helmet. The certification model of any particular helmet is shown on the label on the interior of the helmet shell.

The jawguard model HXG is available for purchase already attached to the HX batting helmets, or the HXG jawguard and HX helmet can be purchased separately and attached by the customer. Either assembly scenario is approved and will not affect the certification status of the helmet.

This statement is valid for all HX batting helmets, regardless of the color or finish applied to the helmet shell. It includes, but is not limited to, the following SKU prefixes:

- HXM
- HXM2
- HXMJG
- HXM2JG
- HXU

We hope this is helpful and provides the requested clarification. Please let us know if you have any questions.

Best regards,

Megan Hunt
